## Contents

### Articles

- 1-19      **Campfield, Patrick A., and Edward D. Houde**  
Ichthyoplankton community structure and comparative trophodynamics  
in an estuarine transition zone
- 20-33      **Friess, Claudia, and George R. Sedberry**  
Age, growth, and spawning season of red bream (*Beryx decadactylus*)  
off the southeastern United States
- 34-47      **Cox, M. Keith, Ron Heintz, and Kyle Hartman**  
Measurements of resistance and reactance in fish with the use  
of bioelectrical impedance analysis: sources of error
- 48-55      **Sturdevant, S. Kersey, and Kelton L. Clark**  
An evaluation of the effects of blue crab (*Callinectes sapidus*)  
behavior on the efficacy of crab pots as a tool for estimating  
population abundance
- 56-67      **Merritt, Daniel, Mary K. Donovan, Christopher Kelley, Lynn  
Waterhouse, Michael Parke, Kevin Wong, and Jeffrey C. Drazen**  
BotCam: a baited camera system for nonextractive monitoring  
of bottomfish species
- 68-78      **Able, Kenneth W., Mark C. Sullivan, Jonathan A. Hare, Gretchen  
Bath-Martin, J. Christopher Taylor, and Roland Hagan**  
Larval abundance of summer flounder (*Paralichthys dentatus*)  
as a measure of recruitment and stock status
- 79-89      **Kurita, Yutaka, Uichiro Fujinama, and Masafumi Amano**  
The effect of temperature on the duration of spawning  
markers—migratory-nucleus and hydrated oocytes and  
postovulatory follicles—in the multiple-batch spawner  
Japanese flounder (*Paralichthys olivaceus*)

The *Fishery Bulletin* (ISSN 0090-0656) is published quarterly by the Scientific Publications Office, National Marine Fisheries Service, NOAA, 7600 Sand Point Way NE, BIN C15700, Seattle, WA 98115-0070. Periodicals postage is paid at Seattle, WA. POSTMASTER: Send address changes for subscriptions to *Fishery Bulletin*, Superintendent of Documents, Attn.: Chief, Mail List Branch, Mail Stop SSOM, Washington, DC 20402-9373.

Although the contents of this publication have not been copyrighted and may be reprinted entirely, reference to source is appreciated.

The Secretary of Commerce has determined that the publication of this periodical is necessary according to law for the transaction of public business of this Department. Use of funds for printing of this periodical has been approved by the Director of the Office of Management and Budget.

**For sale** by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402. Subscription price per year: \$36.00 domestic and \$50.40 foreign. Cost per single issue: \$21.00 domestic and \$29.40 foreign. **See back for order form.**

---

The *Fishery Bulletin* carries original research reports and technical notes on investigations in fishery science, engineering, and economics. It began as the Bulletin of the United States Fish Commission in 1881; it became the Bulletin of the Bureau of Fisheries in 1904 and the *Fishery Bulletin* of the Fish and Wildlife Service in 1941. Separates were issued as documents through volume 46; the last document was No. 1103. Beginning with volume 47 in 1931 and continuing through volume 62 in 1963, each separate appeared as a numbered bulletin. A new system began in 1963 with volume 63 in which papers are bound together in a single issue of the bulletin. Beginning with volume 70, number 1, January 1972, the *Fishery Bulletin* became a periodical, issued quarterly. In this form, it is available by subscription from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402. It is also available free in limited numbers to libraries, research institutions, State and Federal agencies, and in exchange for other scientific publications.

# Fishery Bulletin

## Guidelines for authors

### Manuscript Preparation

Contributions published in *Fishery Bulletin* describe original research in marine fishery science, fishery engineering and economics, as well as the areas of marine environmental and ecological sciences (including modeling). Preference will be given to manuscripts that examine processes and underlying patterns. Descriptive reports, surveys, and observational papers may occasionally be published but should appeal to an audience outside the locale in which the study was conducted. Although all contributions are subject to peer review, responsibility for the contents of papers rests upon the authors and not on the editor or publisher. *Submission of an article implies that the article is original and is not being considered for publication elsewhere.* **Articles** may range from relatively short contributions (10–15 typed, double-spaced pages, tables and figures not included) to extensive contributions (20–30 typed pages). Manuscripts must be written in English; authors whose native language is not English are strongly advised to have their manuscripts checked by English-speaking colleagues before submission.

**Title page** should include authors' full names and mailing addresses and the senior author's telephone, fax number, and e-mail address, and a list of key words to describe the contents of the manuscript. **Abstract** should be limited to 200 words (one-half typed page), state the main scope of the research, and emphasize the author's conclusions and relevant findings. Do not review the methods of the study or list the contents of the paper. Because abstracts are circulated by abstracting agencies, it is important that they represent the research clearly and concisely. **Text** must be typed in 12 point Times New Roman font throughout. A brief introduction should convey the broad significance of the paper; the remainder of the paper should be divided into the following sections: **Materials and methods**, **Results, Discussion (or Conclusions)**, and **Acknowledgments**. Headings within each section must be short, reflect a logical sequence, and follow the rules of multiple subdivision (i.e., there can be no subdivision without at least two items). The entire text should be intelligible to interdisciplinary readers; therefore, all acronyms, abbreviations, and technical terms should be written out in full the first time they are mentioned. Include FAO common names for species in the list of keywords and in the introduction. Regional common names may be used throughout the rest of the text if they are different from FAO common names which can be found at <http://www.fishbase.org/search.html>. Follow the U.S. Government Printing Office Style Manual (2000 ed.) and Scientific Style and Format: the CSE Manual for Authors, Editors, and Publishers (7<sup>th</sup> ed.) for editorial

style; for fish nomenclature follow the most current issue of the American Fisheries Society's Common and Scientific Names of Fishes from the United States, Canada, and Mexico, 6<sup>th</sup> ed. Dates should be written as follows: 11 November 2000. Measurements should be expressed in metric units, e.g., 58 metric tons (t); if other units of measurement are used, please make this fact explicit to the reader. Write out the numbers zero through nine unless they form part of measurement units (e.g., nine fish but 9 mm). Refrain from using the shorthand slash (/), an ambiguous symbol, in the general text.

**Equations and mathematical symbols** Set equations from a standard mathematical program (Math-Type) or tool (Equation Editor in MS Word). LaTeX is acceptable for more advanced computations. For mathematical symbols in the general text ( $\alpha$ ,  $\chi^2$ ,  $\pi$ ,  $\pm$ , etc.), use the symbols provided by the MS Word program and italicize all variables. Do not use the photo mode when creating these symbols in the general text.

**Literature cited** comprises published works and those accepted for publication in peer-reviewed literature (in press). Follow the name and year system for citation format in the "Literature cited" section (that is say, citations should be listed alphabetically by the authors' last names, and then by year if there is more than one citation with the same authorship). If there is a sequence of citations in the text, list chronologically: (Smith, 1932; Green, 1947; Smith and Jones, 1985). Abbreviations of serials should conform to abbreviations given in Cambridge Scientific Abstracts ([http://www.csa.com/ids70/serials\\_source\\_list.php?ab=biolclast-set-c](http://www.csa.com/ids70/serials_source_list.php?ab=biolclast-set-c)). Authors are responsible for the accuracy and completeness of all citations. Literature citation format: Author (last name, followed by first-name initials). Year. Title of report or manuscript. Abbreviated title of the series to which it belongs. Always include number of pages. Cite all software and special equipment or chemical solutions used in the study, not in a footnote but within parentheses in the text (e.g., SAS, vers. 6.03, SAS Inst., Inc., Cary, NC).

**Tables** are often overused in scientific papers; it is seldom necessary or even desirable to present all the data associated with a study. Tables should not be excessive in size and must be cited in numerical order in the text. Headings should be short but ample enough to allow the table to be intelligible on its own. All unusual symbols must be explained in the table legend. Other incidental comments may be footnoted with italic numeral footnote markers. Use asterisks to indicate significance in statistical data. Do not type table legends on a separate page; place them above the table data. *Do not submit tables in photo mode.*

**Figures** include line illustrations, photographs (or slides), and computer-generated graphs and must be cited in numerical order in the text. Graphics should aid in the comprehension of the text, but they should be limited to presenting patterns rather than raw data. Figures should not exceed one figure for every four pages of text. Figures must be labeled with author's

name and number of the figure. Avoid placing labels vertically (except for  $y$  axis). Figure legends should explain all symbols and abbreviations and should be double-spaced on a separate page at the end of the manuscript. Color is allowed in figures to show morphological differences among species (for species identification), to show stain reactions, and to show gradations in temperature contours within maps. Color is discouraged in graphs, and for the few instances where color may be allowed, the use of color will be determined by the Managing Editor.

- Zeros should precede all decimal points for values less than one.
- Sample size,  $n$ , should be italicized.
- Capitalize the first letter of the first word in all labels within figures.
- Do not use overly large font sizes in maps and for units of measurements along axes in figures.
- Do not use bold fonts or bold lines in figures.
- Do not place outline rules around graphs.
- Use a comma in numbers of five digits or more (e.g. 13,000 but 3000).
- Maps require a North arrow and degrees latitude-longitude (e.g., 170°E).

**Failure to follow these guidelines  
and failure to correspond with editors  
in a timely manner will delay  
publication of a manuscript.**

**Copyright law** does not apply to *Fishery Bulletin*, which falls within the public domain. However, if an author reproduces any part of an article from *Fishery Bulletin* in his or her work, reference to source is considered correct form (e.g., Source: Fish. Bull. 97:105).

### Submission

Submit manuscript online at <http://mc.manuscriptcentral.com/fisherybulletin>. Commerce Department personnel should submit papers under a completed NOAA Form 25-700. For further details on electronic submission, please contact the Scientific Editorial Office directly at

[julie.scheurer@noaa.gov](mailto:julie.scheurer@noaa.gov)

Once the manuscript has been accepted for publication, you will be asked to submit a final electronic copy of your manuscript. When requested, the text and tables should be submitted in Word format. Figures should be sent as PDF files, Windows metafiles, tiff files, or EPS files. Send a copy of figures in the original software if conversion to any of these formats yields a degraded version.

**Questions?** If you have questions regarding these guidelines, please contact the Managing Editor, Sharyn Matriotti, at

[Sharyn.Matriotti@noaa.gov](mailto:Sharyn.Matriotti@noaa.gov)

Questions regarding manuscripts under review should be addressed to Julie Scheurer, Associate Editor.
